INDEPENDENT AUDITORS' REPORT

To the policyholders of
West Wawanosh Mutual Insurance Company

Opinion

We have audited the accompanying financial statements of West Wawanosh Mutual Insurance Company (“the Company”), which are comprised of the statement of financial position as at December 31, 2018 and the statements of comprehensive income, policyholders’ equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects the financial position of the Company as at December 31, 2018, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditors’ Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company’s financial reporting process.

Auditors’ Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors’ report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

INDEPENDENT AUDITORS' REPORT (CONTINUED)

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of the auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The accompanying notes are an integral part of these financial statements

1. CORPORATE INFORMATION

West Wawanosh Mutual Insurance Company (the Company) is incorporated under the laws of Ontario and is subject to the Ontario Insurance Act. It is licensed to write property, liability, automobile and farmers' accident insurance in Ontario. The Company's head office is located in Dungannon, Ontario.

The Company is subject to rate regulation in the automobile business that it writes. Before automobile insurance rates can be changed, a rate filing is prepared as a combined filing for most Ontario Farm Mutuals. The rate filing includes actuarial justification for rate increases or decreases. All rate filings are approved or denied by the Financial Services Commission of Ontario. Rate regulation may affect the automobile revenues that are earned by the Company. The actual impact of rate regulation would depend on the competitive environment at the time.

These financial statements have been authorized for issue by the Board of Directors on February 7, 2019.

2. BASIS OF PREPARATION

(a) Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (the IASB).

(b) Basis of measurement

These financial statements were prepared under the historical cost convention except for those financial assets that have been measured at fair value through profit and loss (FVTPL).

The financial statements are presented in Canadian dollars (CDN), which is also the Company's functional currency.

(c) Judgment and estimates

The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. Estimates and judgments are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions. The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the period of the change, if the change affects that period only; or in the period of the change and future periods, if the change affects both. The areas involving critical judgments and estimates in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements within the next financial year are:

- The calculation of unpaid claims, including the determination of the initial claim liability, the estimate of time until ultimate settlement and the performance of a liability adequacy test (Note 4).
- The determination of the recoverability of deferred policy acquisition expenses (Note 4).
- The classification of financial assets at FVTPL, which includes assessing the business model within which the assets are held and whether the contractual terms of the assets are solely payments of principal and interest on the principal amount outstanding (Note 5).
- The estimate of the tax liability including the related interest and penalties in the current tax provision (Note 11).

In addition, in preparing the financial statements, the notes to the financial statements were ordered such that the most relevant information was presented earlier in the notes and the disclosures that management deemed to be immaterial were excluded from the notes to the financial statements. The determination of the relevance and materiality of disclosures involved significant judgement.

2. BASIS OF PREPARATION (CONTINUED)

(d) Foreign currency translation

Foreign currency accounts are translated into Canadian dollars as follows:

At the transaction date, each asset, liability, revenue and expense denominated in a foreign currency is translated into Canadian dollars by the use of the exchange rate in effect at that date. At the year-end date, unsettled monetary assets and liabilities are translated into Canadian dollars by using the exchange rate in effect at the year-end date and the related translation differences are recognized in comprehensive income.

3. ADOPTION OF NEW ACCOUNTING STANDARDS

Accounting standards, interpretations and amendments effective for accounting years beginning on or after January 1, 2018 did not materially affect the Company's financial statements other than those described below.

IFRS 9 Financial Instruments (IFRS 9)

On January 1, 2018, the Company adopted *IFRS 9 Financial Instruments* (IFRS 9), which supersedes *IAS 39 Financial Instruments: Recognition and Measurement* (IAS 39). IFRS 9 includes revised guidance on the classification and measurement of financial assets and liabilities; new guidance for measuring impairment on financial assets; and new hedge accounting guidance.

On adoption of IFRS 9, in accordance with its transitional provisions, the Company has not restated prior periods but has reclassified the financial assets held at January 1, 2018, retrospectively, based on the new classification requirements and the characteristics of each financial instrument as at the transition date. For financial liabilities, IFRS 9 retains most of the IAS 39 requirements. The Company did not choose the option of designating any financial liabilities at FVTPL as such, the adoption of IFRS 9 did not impact the Company's accounting policies for financial liabilities.

(a) Classification and measurement of financial instruments

Under IFRS 9, financial assets are classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows. IFRS 9 contains three primary measurement categories for financial assets: measured at amortized cost, fair value through other comprehensive income (FVTOCI), and FVTPL.

The following table shows the original classification and carrying amounts under IAS 39 and the new classification and carrying amounts under IFRS 9 for each class of the Company's financial assets and financial liabilities as at January 1, 2018.

Financial Instrument	Note	IAS 39	IFRS 9
Financial Assets			
Cash		Loans and receivables	Amortized cost
		\$ 2,121,021	\$ 2,121,021
Investments - GIC/ Bankers' acceptance	5	FVTPL	FVTPL
		2,405,250	2,405,250
Investments - bonds	5	FVTPL	FVTPL
		847,137	847,137
Investments - mutual funds	5	FVTPL	FVTPL
		7,422,839	7,422,839
Investments - pooled funds	5	FVTPL	FVTPL
		23,760,475	23,760,475
Investments - other	5	FVTPL	FVTPL
		2,287,243	2,287,243
Financial Liabilities			
Accounts payable and accrued liabilities		Other financial liabilities	Amortized cost
		790,634	790,634

(b) Impairment of financial assets

IFRS 9 replaces the incurred loss model in IAS 39 with an expected credit loss ("ECL") model. This applies to financial assets classified at amortized cost and debt instruments classified through FVTOCI. Under IFRS 9, credit losses are recognized earlier than under IAS 39. This change did not have a material impact to the Company's financial statements.

3. ADOPTION OF NEW ACCOUNTING STANDARDS (CONTINUED)

(b) Impairment of financial assets (continued)

Impairment model is not required when applying FVTPL to financial instruments. Impairment for accounts receivable is not applicable as insurance contracts are not in the scope of IFRS 9.

(c) Hedge accounting

The new hedge accounting model which replaces hedge accounting guidance in IAS 39 did not impact the Company's financial statements.

(d) Disclosures

Amendments were also made to IFRS 7 introducing expanded qualitative and quantitative disclosures related to IFRS 9, which the Company has also adopted for the annual period beginning January 1, 2018.

Impacts of adoption of IFRS 9

The Company continues to classify its investments at fair value through profit or loss, based on the business model assessment, and the adoption of IFRS 9 has not had a material impact on the Company's financial position or performance.

4. INSURANCE CONTRACTS

In accordance with IFRS 4, Insurance Contracts, the Company has continued to apply the accounting policies it applied in accordance with pre-changeover Canadian generally accepted accounting principles.

Balances arising from insurance contracts primarily include unearned premiums, provisions for unpaid claims and adjustment expenses, the Reinsurer's share of provisions for unpaid claims and adjustment expenses, and deferred policy acquisition expenses.

(a) Premiums and unearned premiums

Premiums written comprise the premiums on contracts incepting in the financial year. Premiums written are stated gross of commissions payable to agents and exclusive of taxes levied on premiums.

The Company recognizes premium income evenly over the term of the insurance policy using the pro rata method. The portion of the premium related to the unexpired portion of the policy at the end of the fiscal year is reflected in unearned premiums (UEP).

Changes in unearned premiums recorded in the statement of financial position for the years-ended December 31, 2018 and 2017 and their impact on net premiums earned for the two years follow:

	2018	2017
Balance, beginning of the year	\$ 8,353,480	\$ 7,902,700
Premiums written	18,189,937	16,724,089
Premiums earned during the year	(17,262,247)	(16,273,309)
Changes in UEP recognized in income	927,690	450,780
Balance, end of the year	\$ 9,281,170	\$ 8,353,480

Pricing of property and liability policies are based on assumptions in regard to trends and past experience, in an attempt to correctly match policy revenue with exposed risk. Automobile premiums are subject to approval by the Financial Services Commission of Ontario and therefore may result in a delay in adjusting the pricing to exposed risk.

West Wawanosh Mutual Insurance Company

Notes to Financial Statements

December 31, 2018

4. INSURANCE CONTRACTS (CONTINUED)

(a) Premiums and unearned premiums (continued)

The Company is exposed to a pricing risk to the extent that unearned premiums are insufficient to meet the related future policy costs. Evaluation is performed regularly to estimate future claims costs, related expenses, and expected profit in relation to unearned premiums. There was no premium deficiency at December 31, 2018 and 2017.

Amounts due from policyholders are measured at amortized cost less any impairment losses. These amounts are short-term in nature consisting of a large number of policyholders, and are not subject to material credit risk. Regular review of amounts outstanding is performed to ensure credit worthiness.

(b) Deferred policy acquisition expenses

Acquisition costs are comprised of agents' commissions, premium taxes and other incremental costs of acquiring and renewing policies. These costs are deferred and amortized over the terms of the related policies to the extent that they are considered to be recoverable from unearned premiums, after considering the related anticipated claims and expenses.

Changes in deferred policy acquisition expenses recorded in statement of financial position for the years-ended December 31, 2018 and 2017 and their impact on fees, commissions and other acquisition expenses for the two years follow:

	2018	2017
Balance, beginning of the year	\$ 1,588,290	\$ 1,479,900
Acquisition costs incurred	2,972,639	3,022,840
Expensed during the year	(2,804,070)	(2,914,450)
	\$ 1,756,859	\$ 1,588,290

(c) Unpaid claims and adjustment expenses

Individual loss estimates are provided on each claim reported. In addition, provisions are made for adjustment expenses, claims development, changes in reported claims and for claims incurred but not reported, based on past experience and business in force. The estimates are regularly reviewed and updated, and any resulting adjustments are included in current income.

A summary of the Company's outstanding gross unpaid claims liabilities, related reinsurer's share of unpaid claims and the net insurance liabilities follows:

	December 31, 2018			December 31, 2017		
	Gross	Reinsurance	Net	Gross	Reinsurance	Net
Outstanding claims provision						
Long settlement term	\$ 3,628,369	\$ 1,893,072	\$ 1,735,297	\$ 3,493,221	\$ 1,810,528	\$ 1,682,693
Short settlement term	4,463,558	2,339,416	2,124,142	3,811,916	1,796,711	2,015,205
Facility Association and other residual pools	233,000	-	233,000	225,000	-	225,000
	8,324,927	4,232,488	4,092,439	7,530,137	3,607,239	3,922,898
Provision for claims incurred but not reported	4,365,201	2,015,000	2,350,201	4,450,100	2,120,000	2,330,100
	\$ 12,690,128	\$ 6,247,488	\$ 6,442,640	\$ 11,980,237	\$ 5,727,239	\$ 6,252,998

4. INSURANCE CONTRACTS (CONTINUED)

(c) Unpaid claims and adjustment expenses (continued)

The ultimate cost of long settlement general liability claims are difficult to predict for several reasons. Claims may not be reported until many years after a policy expires. Changes in the legal environment can create further complications. Court decisions and federal and provincial legislation may dramatically increase the liability between the time a policy is written and associated claims are ultimately resolved. For example, liability for exposure to toxic substances and environmental impairment, which did not appear likely or even exist when the policies were written, has been imposed by legislators and judicial interpretation. Tort liability has been expanded by some jurisdictions to cover defective workmanship. Provisions for such difficult-to-estimate liabilities are established by examining the facts of tendered claims and adjusted in the aggregate for ultimate loss expectations based upon historical experience patterns and current socioeconomic trends.

The Company must participate in industry automobile residual pools of business, and recognizes a share of this business based on its automobile market share. The Company records its share of the assets, liabilities, revenue, expenses, unearned premiums and provision for unpaid claims provided by the actuaries of the pools.

Changes in claim liabilities recorded in the statement of financial position for the years-ended December 31, 2018 and 2017 and their impact on claims and adjustment expenses for the two years follow:

	2018	2017
Unpaid claim liabilities - beginning of year	\$ 11,980,237	\$ 11,585,057
Increase (decrease) in estimated losses and expenses, for losses occurring in prior years	(2,393,916)	(1,612,936)
Provision for losses and expenses on claims occurring in the current year	13,089,442	11,323,463
Payment on claims:		
Current year	(6,421,455)	(5,246,326)
Prior years	(3,564,180)	(4,069,021)
Unpaid claim liabilities - end of year	12,690,128	11,980,237
Reinsurer's share and subrogation recoverable	6,247,488	5,727,239
	\$ 6,442,640	\$ 6,252,998

The change in estimate of losses occurring in prior years is due to changes arising from new information received.

Claim development

The principal risk the Company faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long-term claims. Therefore, the objective of the Company is to ensure that sufficient reserves are available to cover these liabilities.

The Company writes insurance primarily over a twelve-month duration. The most significant risks arise through high severity, low frequency events such as natural disasters or catastrophes. A concentration of risk may arise from insurance contracts issued in a specific geographic location since all insurance contracts are written in Ontario.

The above risk exposure is mitigated by diversification across a large portfolio of insurance. The variability of risks is also improved by careful selection and implementation of underwriting strategy guidelines, as well as the use of reinsurance arrangements.

The estimation of claim development involves assessing the future behaviour of claims, taking into consideration the consistency of the Company's claim handling procedures, the amount of information available, the characteristics of the line of business from which the claim arises and claims reporting patterns. In general, the longer the term required for the settlement of a group of claims the more variable the estimates. Short settlement term claims are those which are expected to be substantially paid within a year of being reported.

4. INSURANCE CONTRACTS (CONTINUED)

(c) Unpaid claims and adjustment expenses (continued)

The tables below show how the Company's estimate of cumulative incurred claim cost for each accident year has changed at successive year ends and reconcile the cumulative claims to the amount appearing in the statement of financial position. An accident-year basis is considered to be the most appropriate for the business written by the Company.

4. INSURANCE CONTRACTS (CONTINUED)

(c) Unpaid claims and adjustment expenses (continued)

The risks associated with insurance contracts are complex and subject to a number of variables which complicate quantitative sensitivity analysis. The Company uses various techniques based on past claims development experience to quantify these sensitivities. This includes indicators such as average claim cost, amount of claims frequency, expected loss ratios and claims development.

Results of sensitivity testing based on expected loss ratios are as follows, showing gross and net of reinsurance and the impact on pre-tax income:

	Property claims		Auto claims		Liability claims	
	2018	2017	2018	2017	2018	2017
5% increase in loss ratios						
Gross	\$ 550,036	\$ 483,152	\$ 275,408	\$ 250,834	\$ 87,051	\$ 79,287
Net	\$ 457,295	\$ 427,922	\$ 215,085	\$ 204,475	\$ 68,750	\$ 67,329
5% decrease in loss ratios						
Gross	\$ (550,036)	\$ (483,152)	\$ (275,408)	\$ (250,834)	\$ (87,051)	\$ (79,287)
Net	\$ (457,295)	\$ (427,922)	\$ (215,085)	\$ (204,475)	\$ (68,750)	\$ (67,329)

There have been no significant changes from the previous year in the exposure to risk or policies, procedures and methods used to measure the risk.

(d) Liability adequacy test

At each reporting date the Company performs a liability adequacy test on its insurance liabilities less deferred policy acquisition expenses to ensure the carrying value is adequate, using current estimates of future cash flows, taking into account the relevant investment return. If that assessment shows that the carrying amount of the liabilities is inadequate, any deficiency is recognized as an expense in profit and loss initially by writing down the deferred policy acquisition expense and subsequently by recognizing additional unearned premiums.

(e) Reinsurer's share of provisions for unpaid claims and adjustment expenses

The Company enters into reinsurance contracts in the normal course of business in order to limit potential losses arising from certain exposures. Retention limits for the excess-of-loss reinsurance are set by product line. Reinsurance premiums are accounted for in the same period as the related premiums for the direct insurance business being reinsured.

The Company follows a policy of underwriting and reinsuring contracts of insurance which, in the main, limit the liability of the Company to an amount on any one claim of \$350,000 (2017 - \$350,000) in the event of a property claim, an amount of \$500,000 (2017 - \$500,000) in the event of an automobile claim and \$350,000 (2017 - \$350,000) in the event of a liability claim. The Company also obtained reinsurance which limits the Company's liability to \$900,000 (2017 - \$900,000) in the event of a series of claims arising out of a single occurrence. In addition, the Company has obtained stop loss reinsurance which limits the liability of all claims in a specific year to 70% (2017 - 70%) of gross net earned premiums for all lines.

4. INSURANCE CONTRACTS (CONTINUED)

(e) Reinsurer's share of provisions for unpaid claims and adjustment expenses (continued)

Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Although the Company has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that the reinsurer is unable to meet its obligations assumed under such reinsurance agreements.

Expected reinsurance recoveries on unpaid claims and adjustment expenses are recognized as assets at the same time and using principles consistent with the Company's method for establishing the related liability. Changes in due from reinsurer recorded in the statement of financial position for the years-ended December 31, 2018 and 2017 follow:

	2018	2017
Balance, beginning of the year	\$ 36,521	\$ 21,634
Submitted to reinsurer	1,381,587	1,625,837
Received from reinsurer	(1,409,448)	(1,610,950)
	\$ 8,660	\$ 36,521

Reinsurance is placed with Farm Mutual Re, a Canadian registered reinsurer. Management monitors the creditworthiness of Farm Mutual Re by reviewing their annual financial statements and through ongoing communications. Reinsurance treaties are reviewed annually by management prior to renewal of the reinsurance contract. At year-end, the Company reviewed the amounts owing from its reinsurer and determined that no allowance is necessary.

Changes in reinsurer's share of provision for unpaid claims recorded in the statement of financial position for the years-ended December 31, 2018 and 2017 and their impact on net premiums earned for the two years follow:

Reinsurer's share of provision for unpaid claims

	2018	2017
Balance, beginning of the year	\$ 5,727,239	\$ 5,821,468
New claims reserve	3,459,207	1,768,817
Change in prior years' reserve	(1,174,578)	(237,209)
Submitted to reinsurer	(1,764,380)	(1,625,837)
	\$ 6,247,488	\$ 5,727,239

5. INVESTMENTS

(a) Recognition and initial measurement

The Company recognizes debt instruments on the date on which they are originated. Equity instruments are recognized on the settlement date, which is the date that the asset is received by the Company. The instruments are initially measured at fair value.

(b) Classification and subsequent measurement

The Company classifies its debt instruments, bankers' acceptance and bonds as FVTPL because the Company manages the debt instruments and evaluates their performance on a fair value basis in accordance with a documented investment strategy and the instruments are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

The Company's mutual and pooled funds are redeemable at the option of the holder and therefore considered debt instruments under IFRS 9 that do not give rise to cash flows that are solely payments of principal and interest and therefore are classified as FVTPL.

The Company classifies its equity instruments in listed and unlisted companies, as FVTPL.

The debt and equity instruments are subsequently measured at fair value where the net gains and losses, including any interest or dividend income and foreign exchange gains and losses, are recognized in profit or loss.

(c) Derecognition

The Company derecognizes investments when the contractual rights to the cash flows from the investment expires or the Company transfers the investment. On derecognition, the difference between the carrying amount at the date of derecognition and the consideration received is recognized in profit or loss.

(d) Risks

The following table provides cost and fair value information of investments by type of security and issuer. The maximum exposure to credit risk would be the fair value as shown below.

The Company is exposed to credit risk relating to its debt holdings in its investment portfolio.

The Company's investment policy puts limits on the bond portfolio including portfolio composition limits, issuer type limits, bond quality limits, aggregate issuer limits, corporate sector limits and general guidelines for geographic exposure. The bond portfolio includes 77% (2017 - 82%) of bonds rated A or better. The Company's investment policy limits investment in bonds and debentures of the various ratings to limits ranging from 65% to 100% of the Company's portfolio. The Company's policy requires that funds be invested in bonds and debentures of Federal, Provincial or Municipal Government and corporations rated BBB or better. All fixed income portfolios are measured for performance on a quarterly basis and monitored by management on a monthly basis.

The maximum exposure to investment credit risk is the fair value of investments.

There have been no significant changes from the previous year in the exposure to risk or policies, procedures and methods used to measure credit risk.

West Wawanosh Mutual Insurance Company

Notes to Financial Statements

December 31, 2018

5. INVESTMENTS (CONTINUED)

(d) Risks (continued)

Liquidity risk is the risk that the Company will not be able to meet all cash outflow obligations as they come due. The Company mitigates this risk by monitoring cash activities and expected outflows. The Company's current liabilities arise as claims are made. The Company does not have material liabilities that can be called unexpectedly at the demand of a lender or client. The Company has no material commitments for capital expenditures and there is no need for such expenditures in the normal course of business. Claim payments are funded by current operating cash flow including investment income.

The Company's investment policy requires that 4% to 20% of the Company's portfolio be held in cash and short-term investments, which mitigates liquidity risk. Short-term investments include treasury bills, commercial paper and term deposits with an original maturity of less than one year.

Maturity profile of invested assets is as follows:

	Within 1 year	2 to 5 years	6 to 10 years	Over 10 years	No fixed	Total

Percent of total	62%	33%	5%	0%	0%	

There have been no significant changes from the previous year in the exposure to risk or policies, procedures and methods used to measure liquidity risk.

Market factors that will impact the fair value of investments include three types of risk: currency risk, interest rate risk and equity risk.

The Company's investment policy operates within the guidelines of the Insurance Act. An investment policy is in place and its application is monitored by the Board of Directors. Diversification techniques are utilized to minimize risk. The Policy limits the investment in any one corporate issuer.

The Company's currency risk is related to stock holdings which are limited to United States equities in sectors which are not readily available in Canada. The Company limits its holdings in foreign equity to 10% of the total investment portfolio in accordance with its investment policy. Foreign currency changes are monitored by the Board of Directors and holdings are adjusted when offside of the investment policy.

The Company is exposed to interest rate risk through its interest bearing investments (Bankers' Acceptance, T-Bills, GICs, Pooled funds and Bonds).

Historical data and current information is used to profile the ultimate claims settlement pattern by class of insurance, which is then used in a broad sense to develop an investment policy and strategy. However, because a significant portion of the Company's assets relate to its capital rather than liabilities, the value of its interest rate based assets exceeds its interest rate based liabilities. As a result, generally, the Company's investment income will move with interest rates over the medium to long-term with short-term interest rate fluctuations creating gains or losses in profit or loss.

At December 31, 2018, a 1% move in interest rates, with all other variables held constant, could impact the market value of bonds by \$72,328 (2017 - \$48,956). Also, a 1% move in interest rates, with all other variables held constant, could impact the market value of fixed income pooled funds by \$194,367 (2017 - \$565,596). These changes would be recognized in comprehensive income.

The Company is exposed to equity risk through its portfolio of stocks in unlisted Canadian companies and listing Canadian and US companies. At December 31, 2018, a 10% movement in the stock markets with all other variables held constant would have an estimated effect on the fair values of the Company's equity mutual fund of \$790,600 (2017 - \$742,300) and the equity pooled fund of \$774,400 (2017 - \$671,300). These changes would be recognized in comprehensive income.

The Company's investment policy limits investment in preferred and common shares to a maximum of 25% of the market value of the portfolio.

Equities are monitored by the Board of Directors and holdings are adjusted following each quarter to ensure the investments portfolio remains in compliance with the investment policy.

There have been no significant changes from the previous year in the exposure to risk or policies, procedures and methods used to measure market risk.

5. INVESTMENTS (CONTINUED)

(e) Fair value measurement

The following table provides an analysis of investments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

	Level 1	Level 2	Level 3	Total
December 31, 2018				
Bonds	\$ -	\$ 147,348	\$ -	\$ 147,348

7. CAPITAL MANAGEMENT

For the purpose of capital management, the Company has defined capital as policyholders' equity.

The Company's objectives with respect to capital management are to maintain a capital base that is structured to exceed regulatory requirements and to best utilize capital allocations.

The regulators measure the financial strength of property and casualty insurers using a minimum capital test (MCT). The regulators require property and casualty companies to comply with capital adequacy requirements. This test compares a Company's capital against the risk profile of the organization. The risk-based capital adequacy framework assesses the risk of assets, policy liabilities and other exposures by applying various factors that are dependent on the risks associated with the Company's assets. Additionally, an interest rate risk margin is included in the MCT by assessing the sensitivity of the Company's interest-sensitive assets and liabilities to changes in interest rates. The regulator indicates that the Company should produce a minimum MCT of 150%. During the year, the Company has consistently exceeded this minimum. The regulator has the authority to request more extensive reporting and can place restrictions on the Company's operations if the Company falls below this requirement and deemed necessary.

The Company uses Net Risk Ratio (policyholders' equity to net premiums earned) to monitor capital adequacy. The Company benchmarks an adequate Net Risk Ratio to be over 1:1. The Company's Net Risk Ratio at December 31, 2018 was 2.05:1 (2017 - 2.15:1).

Repairs and maintenance	15,930	26,076
Utilities	12,655	13,668
Other	320,203	276,272
	<u>\$ 1,232,559</u>	<u>\$ 1,194,833</u>

Included in claims expenses were other operating and administrative costs of \$ 398,345 (2017 - \$392,278).

10. SALARIES, BENEFITS AND DIRECTORS' FEES

	2018	2017
Underwriter salaries and benefits	\$ 559,230	\$ 538,114
Other salaries, benefits and directors' fees	647,032	691,317
	<u>\$ 1,206,262</u>	<u>\$ 1,229,431</u>

Included in claims expenses were salary costs of \$345,250 (2017 - \$338,273).

11. INCOME TAXES

Income tax expense is comprised of current and deferred tax. Current tax and deferred tax are recognized in comprehensive income except to the extent that it relates to items recognized directly in equity.

Current income taxes are recognized for the estimated income taxes payable and recoverable on taxable income or loss for the current year and any adjustment to income taxes payable in respect of previous years. Current and deferred income taxes are determined using tax rates and tax laws that have been enacted or substantively enacted by the year-end date.

Deferred tax assets and liabilities are recognized where the carrying amount of an asset or liability differs from its tax base, except for taxable temporary differences arising on the initial recognition of goodwill and temporary differences arising on the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction affects neither accounting or taxable profit or loss.

Notes to Financial Statements

December 31, 2018

11. INCOME TAXES (CONTINUED)

The significant components of the tax effect of the amounts recognized in comprehensive income are composed of:

	2018	2017
Current tax		
Based on current year taxable income (loss)	\$ 9,351	\$ 131,235
Adjustments for over / under provision in prior periods	-	-
	\$ 9,351	\$ 131,235
Deferred tax		
Origination and reversal of temporary differences	\$ (10,850)	\$ 250,300
Total tax effect of amounts recorded in other income	\$ (1,499)	\$ 381,535

Reasons for the difference between tax expense for the year and the expected income taxes based on the statutory tax rate of 26% (2017 - 26%) are as follows:

	2018	2017
Comprehensive income for the year before taxes	\$ 83,756	\$ 1,539,293
Expected taxes based on the statutory rate of 26% (2017 - 26%)	22,193	407,061
Non-deductible portion of claims liabilities	2,512	6,471
Other non-deductible expenses	753	653
Adjustments related to investments	-	(259,799)
Capital cost allowance in excess of depreciation	3,036	1,862
Cumulative eligible capital	9,011	8,555
Canadian dividend income not subject to tax	(28,154)	(33,568)
Total income tax expense (recovery)	\$ 9,351	\$ 131,235

	2018	2017
Deferred tax liabilities		
Deferred tax liabilities to be settled after more than 12 months	\$ -	\$ (1,410)
Deferred tax assets		
Deferred tax assets to be recovered after more than 12 months	108,760	99,320
Net deferred tax asset	\$ 108,760	\$ 97,910

12. STRUCTURED SETTLEMENTS, FIRE MUTUAL GUARANTEE FUND AND FINANCIAL GUARANTEE CONTRACTS

The Company enters into annuity agreements with various life insurance companies to provide for fixed and recurring payments to claimants. Under such arrangements, the Company's liability to its claimants is substantially transferred, although the Company remains exposed to the credit risk that life insurers fail to fulfill their obligations.

The Company is a member of the Fire Mutual Guarantee Fund ("the Fund"). The Fund was established to provide payment of outstanding policyholders' claims if a member company becomes bankrupt. As a result, the Company may be required to contribute assets to their proportionate share in meeting this objective.

These exposures represent financial guarantee contracts. The Company accounts for financial guarantee contracts in accordance with IFRS 4, Insurance Contracts.

13. PROPERTY AND EQUIPMENT AND INTANGIBLE ASSETS

Property and equipment

Property and equipment is initially recorded at cost and subsequently measured at cost less accumulated depreciation and accumulated impairment losses, with the exception of land which is not depreciated. Depreciation is recognized in comprehensive income and is provided on a straight-line basis over the estimated useful lives of the assets.

Intangible assets

Intangible assets consist of market retention and customer related costs. Intangible assets are initially recorded at cost and subsequently measured at cost less accumulated amortization and accumulated impairment losses. Amortization is recognized in comprehensive income and is provided on a straight-line basis over the estimated useful life of the asset, 10 years.

Property and equipment

	Useful Life	2018		
		Cost	Accumulated Depreciation	Net Book Value
Land	N/A	\$ 48,900	\$ -	\$ 48,900
Pavement	20 years	26,400	26,400	-
Buildings	40 years	531,000	360,000	171,000
Computer hardware	5 years	120,200	92,590	27,610
Furniture and fixtures	10 years	224,740	159,930	64,810
Vehicles	4 years	72,245	49,646	22,599
		<u>\$ 1,023,485</u>	<u>\$ 688,566</u>	<u>\$ 334,919</u>
	Useful Life	2017		
		Cost	Accumulated Depreciation	Net Book Value
Land	N/A	\$ 48,900	\$ -	\$ 48,900
Pavement	20 years	26,400	26,400	-
Buildings	40 years	531,000	347,000	184,000
Computer hardware	5 years	126,099	86,089	40,010

13. PROPERTY AND EQUIPMENT AND INTANGIBLE ASSETS (CONTINUED)

Intangible assets	Useful Life	2018		
		Cost	Accumulated Depreciation	Net Book Value
Market retention and customer related costs	10 years	\$ 560,000	\$ 280,000	\$ 280,000

	Useful Life	2017		
		Cost	Accumulated Depreciation	Net Book Value
Market retention and customer related costs	10 years	\$ 560,000	\$ 224,000	\$ 336,000

14. PENSION PLAN

The Company makes contributions to the Ontario Mutual Insurance Association Pension Plan, which is a multi-employer plan, on behalf of members of its staff. Eligible employees participate in the defined benefit plan, which is a money purchase plan. The defined benefit plan specifies the amount of the retirement benefit plan to be received by the employees based on length of service and rates of pay. However, the plan is accounted for as a defined contribution plan as insufficient information is available to account for the plan as a defined benefit plan. The Company is only one of a number of employers that participates in the plan and the financial information provided to the Company on the basis of the contractual agreements is usually insufficient to reliably measure the Company's proportionate share in the plan assets and liabilities on defined benefit accounting requirements.

The defined benefit plan has been closed to future eligible employees effective August 2013. The Company and all current employees who were accruing benefits under the defined benefit plan continue to contribute to the defined benefit plan according to the existing terms of the agreement. Subsequently eligible employees are enrolled in the defined contribution plan. The Company's obligation with respect to this plan is to make specified monthly contributions based on a percentage of employee's eligible earnings.

The Company funds the excess defined benefit based on the Company's percentage of pensionable earnings as calculated by the Pension Plan actuaries. The Pension Plan agreement states that the Company is responsible for its share of any deficit as a result of any actuarial valuation or cost certificate. The minimum funding requirement is the solvency valuation amount determined by the Pension Plan actuary on the valuation dates prescribed by the Pensions Benefit Act. In the event of a wind-up, voluntary withdrawal or bankruptcy, either by the Company or the group as a whole, the Company is responsible for its portion of all expenses and deficit related to such.

The amount contributed to the plan for 2018 was \$131,970 (2017 - \$98,215). The contributions were made for current service and these have been recognized in comprehensive income. These contributions amount to 1.6% of the total contributions made to the Ontario Mutual Insurance Association Pension Plan by all participating entities during the current fiscal year.

Expected contributions to the plan for the next annual reporting period amount to \$135,000, which is based on payments made to the multi- employer plan during the current fiscal year.

The pension plan exposes the Company to a contingent liability for any shortfall in plan assets resulting from insufficient contributions including actuarial losses relating to other participating entities and any shortfall in the plan if other entities cease to participate.

15. OTHER PROVISIONS AND CONTINGENT LIABILITIES

In common with the insurance industry in general, the Company is subject to litigation arising in the normal course of conducting its insurance business which is taken into account in establishing the provision for unpaid claims and adjustment expenses. Management is not aware of any other liability related to legal disputes unrelated to their insurance business for which it is probable that an amount will be paid.

16. RELATED PARTY TRANSACTIONS

The Company entered into the following transactions with key management personnel, which are defined by IAS 24, Related Party Disclosures, as those persons having authority and responsibility for planning, directing and controlling the activities of the Company, including directors and management:

	2018	2017
Compensation		
Salaries, wages and short term employee benefits and directors' fees	\$ 504,424	\$ 444,913
Total pension and other post-employment benefits	45,101	45,244
	\$ 549,525	\$ 490,157
Premiums	\$ 58,356	\$ 54,061
Claims paid	\$ 1,773	\$ 8,559

No amounts were owing to and from key management personnel.

17. STANDARDS, AMENDMENTS AND INTERPRETATIONS NOT YET EFFECTIVE

Certain pronouncements were issued by the IASB or the IFRS Interpretations Committee that are mandatory for accounting years beginning on January 1, 2019 or later.

- IFRS 16 Leases supersedes IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases - Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. It eliminates the distinction between operating and finance leases from the perspective of the lessee. All contracts that meet the definition of a lease will be recorded in the statement of financial position with a 'right of use' asset and a corresponding liability. The asset is subsequently accounted for as property, plant and equipment or investment property and the liability is unwound using the interest rate inherent in the lease. The accounting requirements from the perspective of the lessor remains largely in line with previous IAS 17 requirements. The effective date for IFRS 16 is January 1, 2019. The adoption of IFRS 16 is not expected to have a material impact on the Company's financial position or performance.
- IFRS 17 Insurance Contracts supersedes IFRS 4 Insurance Contracts. IFRS 17 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts. IFRS 17 requires entities to measure insurance contract liabilities using updated estimates and assumptions that reflect the timing of cash flows and any uncertainty relating to insurance contracts. Additionally, IFRS 17 requires entities to recognize profits as it delivers insurance services. The effective date for IFRS 17 is January 1, 2022. The Company has not yet determined the impact of adoption, however it is expected to significantly impact the overall financial statements.
- IFRIC 23 Uncertainty over Income Tax Treatments provides guidance on recognition and measurement of uncertain income tax treatments. The effective date for IFRIC 23 is January 1, 2019. The Company is in the process of evaluating the impact of this interpretation.
